V-Mail 2.0

Sep-2017

Email Software for Vessel Needs
http://falconmegasolutions.com/v-mail-2.0.html

What is NEW

✓ Two Connection, Two Email addresses but one email client; Ability to use two email address simultaneously, one for FMT IDP Terminals (Email Messaging only, without file attachment) and one for FBB/Internet emails (with file attachment support);

✓ Much simple and user friendly as compared to major marine email clients e.g. Amosconnect, SkyFiles, GT Mail Plus etc.

✓ Lowest License fee – FleetBroadband and Internet usage;

✓ Full Functional Free Trial is available for customer satisfaction before purchasing of License;

✓ Free License to use with FMT Terminals; e.g. FMT-SSAS-V1, FMT-SSAS-V2, FMT-MAT-V1, FMT-MAT-V2;

✓ High cost saving on FBB airtime bills – Perfect solution with use of FMT Email Servers and V-Mail Client to control over the data usage and SPAM filtering;

✓ Capability to Send and Receive emails through Inmarsat FleetBroadband (FBB) and any other Internet Connection available onboard, in addition to FMT IDP (SkyWave/Orbcomm) Terminals;

✓ 24/7 Connectivity through FMT IDP terminals without any stand-by cost of airtime;

✓ 27/7 Connectivity, manual connection or on demand connection for FBB/Internet;

✓ Full control by Vessel Management through FMT Control Panel at www.falconmegatrack.com ; control email text size, attachment size, black list and white list email recipients,

✓ Remote Communication Monitoring by Vessel Management; functionality of auto CC and auto BCC to particular email address for communication control and backup purpose;

✓ Future Plan for Android V-Mail Client for Mobile Phone and Tablets via Wi-Fi Connection, to eliminate the use of PC; useful for small boats where computer is not available wheel house;
